current decisions of the courts of record of New York State, namely: Court of Appeals, Supreme Court, New York Superior Court, New York Common Pleas, Superior Court of Buffalo, City Court of New York, City Court of Brooklyn, and the Surrogates' Courts" (varies slightly). In the past decade, the field of comparative cognition has grown and thrived. No less rigorous than purely behavioristic investigations, examinations of animal intelligence are useful for scientists and psychologists alike in their quest to understand the nature and mechanisms of intelligence. Extensive field research of various species has yielded exciting new areas of research, integrating findings from psychology, behavioral ecology, and ethology in a unique and wide-ranging synthesis of theory and research on animal cognition. The Oxford Handbook of Comparative Cognition contains sections on perception and illusion, attention and search, memory processes, spatial cognition, conceptualization and categorization, problem solving and behavioral flexibility, and social cognition processes including findings in primate tool usage, pattern learning, and counting. The authors have incorporated findings and theoretical approaches that reflect the current state of the field. This comprehensive volume will be a must-read for students and scientists who want to know about the state of the art of the modern science of comparative cognition. First published in 2004. It may well be that genius begins where fear ends: not to be afraid to question what is known, not to be afraid to be original. David Ben-Gurion did not try to imitate anyone...He was endowed with a mind that sought out what was new and was capable of penetrating the deepest recesses. First and foremost, he challenged every Jew who believed it was the fate of Jews to live in the Diaspora, and he believed that the Jews could be a nation of farmers, industrialists, soldiers, pioneers, and not only scientists and intellectuals. He decided that the time had come to establish a Jewish state, yet once it had been founded, he was not satisfied- it must be an exemplary state, a chosen state. Compilation of materials on the 1968 trial of dissenting writers in the U.S.S.R. including alleged entanglement with the earlier Sinyavsky-Daniel case. The book thus offers both a major study and an invaluable reference work for anyone interested in the

development of civilization in ancient Egypt. The increase in the number of countries that have abolished the death penalty since the end of the Second World War shows a steady trend towards worldwide abolition of capital punishment. This book focuses on the political and legal issues raised by the death penalty in "countries in transition", understood as countries that have transitioned or are transitioning from conflict to peace, or from authoritarianism to democracy. In such countries, the politics that surround retaining or abolishing the death penalty are embedded in complex state-building processes. In this context, Madoka Futamura and Nadia Bernaz bring together the work of leading researchers of international law, human rights, transitional justice, and international politics in order to explore the social, political and legal

factors that shape decisions on the death penalty, whether this leads to its abolition, reinstatement or perpetuation. Covering a diverse range of transitional processes in Asia, Africa, Latin America, Europe, and the Middle East, *The Politics of the Death Penalty in Countries in Transition* offers a broad evaluation of countries whose death penalty policies have rarely been studied. The book would be useful to human rights researchers and international lawyers, in demonstrating how transition and transformation, 'provide the catalyst for several of interrelated developments of which one is the reduction and elimination of capital punishment'.
